Author:
Mael Ogier

Supervisors:

Dr. David Coquil

Dr. Elöd Egyed-Zsigmond

This thesis submitted in fulfilment of the requirements for the degree of Master of Science

in the

 $\begin{array}{c} {\rm Informatique \; - \; Information \; und \; Kommunikation \; (IFIK)} \\ {\rm Double \; Master \; Program} \end{array}$ 

August 2015

"I have a dream for the Web [in which computers] become capable of analyzing all the data on the Web—the content, links, and transactions between people and computers. A "Semantic Web", which should make this possible, has yet to emerge, but when it does, the day-to-day mechanisms of trade, bureaucracy and our daily lives will be handled by machines talking to machines."

Tim Berners-Lee

# Acknowledgements

This master thesis was done in the context of the double master degree Informatique - Information und Kommunikation (IFIK), which brings together two Master programs: a degree in computer engineering at the National Institute of Applied Sciences in Lyon (INSA Lyon) and a Master in Informatik (Schwerpunkt: Information und Kommunikationssysteme) at the University of Passau.
